 Subdivision Plats 3

 Certified Survey Maps..... 3

 Condominium Plats..... 3

 Building Permit Applications..... 3

Section (c): A list and map of undeveloped parcels in the municipality that are zoned for residential development 4

Section (d): A list of all undeveloped parcels in the municipality that are suitable for, but not zoned for, residential development, including vacant sites and sites that have potential for redevelopment, and a description of the zoning requirements and availability of public facilities and services for each property. 22

Section (e): An analysis of the municipality's residential development regulations, such as land use controls, site improvement requirements, fees and land dedication requirements, and permit procedures. The analysis shall calculate the financial impact that each regulation has on the cost of each new subdivision. The analysis shall identify ways in which the municipality can modify its construction and development regulations, lot sizes, approval processes, and related fees to do each of the following: 1) Meet existing and forecasted housing demand. 2) Reduce the time and cost necessary to approve and develop a new residential subdivision in the municipality by 20 percent. 29

- **Robin Palm**, Planner II
- **Lisa Olley**, Community Engagement Manager

Background

The village prepared this report to satisfy the requirements as outlined in Section 66.10013 of the Wisconsin Statutes. Section 66.10013 reads as follows:

- (1) In this section, “municipality” means a city or village with a population of 10,000 or more.
- (2) Not later than January 1, 2020, a municipality shall prepare a report of the municipality's implementation of the housing element of the municipality's comprehensive plan under s. 66.1001. The municipality shall update the report annually, not later than January 31. The report shall contain all of the following:
 - (a) The number of subdivision plats, certified survey maps, condominium plats, and building permit applications approved in the prior year.
 - (b) The total number of new residential dwelling units proposed in all subdivision plats, certified survey maps, condominium plats, and building permit applications that were approved by the municipality in the prior year.
 - (c) A list and map of undeveloped parcels in the municipality that are zoned for residential development.
 - (d) A list of all undeveloped parcels in the municipality that are suitable for, but not zoned for, residential development, including vacant sites and sites that have potential for redevelopment, and a description of the zoning requirements and availability of public facilities and services for each property.
 - (e) An analysis of the municipality's residential development regulations, such as land use controls, site improvement requirements, fees and land dedication requirements, and permit procedures. The analysis shall calculate the financial impact that each regulation has on the cost of each new subdivision. The analysis shall identify ways in

which the municipality can modify its construction and development regulations, lot sizes, approval processes, and related fees to do each of the following:

1. Meet existing and forecasted housing demand.
2. Reduce the time and cost necessary to approve and develop a new residential subdivision in the municipality by 20 percent.

(3) A municipality shall post the report under sub. (2) on the municipality's Internet site on a web page dedicated solely to the report and titled "Housing Affordability Analysis."

Sections (2)(a) and (2)(b) – Subdivision Plats, Certified Survey Maps, Condominium Plats, and Building Permit Applications

Subdivision Plats

Table 0-1

	Subdivision Plats	Number of Lots	Notes
	Sorenson Creek	9	Preliminary plat
	Coach Hills Addition No. 2	10	Preliminary plat
	Savannah Grove	73	Final plat, not recorded
	Christina Estates Addition No. 1	21	Final plat
Total	4	113	

Certified Survey Maps

Table 0-2

	Certified Survey Map Number or Address	Number of Lots	Notes
	3471	1	Division for land ownership purposes
	3450	1	
	1919 Newman Road	1	Not recorded
	3453	1	
	3501	1	
	3514	3	
	3473	3	
	3481	1	Commercial development
Total	8	12	

Condominium Plats

	Condominium Plats	Number of Units	Notes
	The Villas at Coach Hills	21	Not recorded
Total	1	21	

Building Permit Applications

Table 0-3

	Building Permit Applications	Building Permits 2021	Number of Units 2021
	Building Permits 1 & 2 Family	42	43
	Building Permits Multi-Family	8	180
Total		57	248

Section (c): A list and map of undeveloped parcels in the municipality that are zoned for residential development

THE VILLAGE LISTS THE ZONING REQUIREMENTS FOR DEVELOPMENT OF EACH LISTED PARCEL IN CHAPTER 90 OF THE MOUNT PLEASANT CODE OF ORDINANCES.

Section (e): An analysis of the municipality's residential development regulations, such as land use controls, site improvement requirements, fees and land dedication requirements, and permit procedures. The analysis shall calculate the financial impact that each regulation has on the cost of each new subdivision. The analysis shall identify ways in which the municipality can modify its construction and development regulations, lot sizes, approval processes, and related fees to do each of the following: 1) Meet existing and forecasted housing demand. 2) Reduce the time and cost necessary to approve and develop a new residential subdivision in the municipality by 20 percent.

Analysis

Construction and Development Regulations

This year, the village staff continued to receive complaints about the costs of labor and materials. Labor prices are subject primarily to market conditions, state law, and federal law, and the village cannot widely affect such prices. Similarly, material prices are subject to the same market forces, and the village is itself subject to cost increases for raw materials such as stone or asphalt. These costs increased rapidly during the previous year for all types of construction materials. The village staff have also heard from developers that the increased costs of borrowing, mainly due to the Federal Reserve's policies to reduce inflation, have negatively affected the feasibility of some projects. While this may help reduce inflationary pressures on building supplies, the net effect on construction will play out over the next couple of years.¹

Developers could realize some cost savings on public streets by reducing the cross-section of public streets, when proper. The village's subdivision design standards include guidance on when such reductions may be proper. The current cross-section is 36 feet, which includes 32 feet of asphalt pavement and four feet of concrete curb tray. In this cross-section, the village typically distributes the traveling public 11 feet per lane and 7.5 feet per parking lane (some of which is curbing). Reducing the cross-section by two feet to 30 feet would allow for 10-foot lanes and reduce the cost of constructing a public street by the corresponding aggregate base and asphaltic concrete pavement. Per linear foot, this reduction would result in a cost savings of approximately 6%, using the prices of the 2020 village paving program.

¹ While this report's data focuses on 2021, it was written in 2022 so the village staff acknowledged general trends which may affect development over multiple years.

Home Sizes

Per the 2020 report, the village supplied a significant amount of home size flexibility in its 2020 zoning code update. Developers may now vary the size and type of home and lot within the same zoning district, which may help developers use land efficiently, and slightly increase housing density without the added regulatory cost of a zoning map amendment application. This flexibility also supplies long-term market stability, as developers may plat several types and sizes of lots as market conditions change over time.

Fees and Dedication Requirements

A comprehensive discussion of village fees and dedication requirements lies within the 2022 Housing Fee Report.

Affordability Analysis

Affordability Levels

Table 0-1

Racine County FY 2021 Yearly "Affordability" Levels²

AMI Levels	Persons in Family			
	1	2	3	4
100 percent of AMI	\$54,100	\$61,800	\$69,500	\$77,200
Low Income Limits (80% of AMI)	\$43,250	\$49,400	\$55,600	\$61,750
Multifamily tax subsidy limits (60% of AMI)	\$32,460	\$37,080	\$41,700	\$46,320
Very Low Income Limits (50% of AMI)	\$27,050	\$30,900	\$34,750	\$38,600
Extremely Low Income Limits (30% of AMI)	\$16,250	\$18,550	\$21,960	\$26,500

Table 0-2

Racine County FYI 2021 Monthly "Affordability" Housing Budget (rent + utilities)

Analysis

The charts above show the existing rental housing in the village is affordable for a household of four as defined as below \$1,543.75 (80% Area Median Income, or AMI). The highest number of rental units in the village by type are two-bedroom units between \$750 and \$999, which is affordable for those making 60% of the AMI for families of two or fewer, and within \$50 of affordability for a family of three. For owner-occupied housing, the market values 47.2% of the owner-occupied housing stock under \$200,000, which is a decrease from the previous year's 54.6%. This value qualifies as affordable for four-person households at 80% AMI. The market values 29.4% of the owner-occupied housing stock under \$150,000, which qualifies as affordable for four-person households at 60% AMI. This value is also a decrease from the previous year's 31.7%. Therefore, while much of the housing stock may currently be affordable for different household sizes making at or less than AMI, the trends described show potential long-term reductions in affordable housing stock.

The village staff note that the increases in cost of construction may affect the long-term affordability of the village if population growth continues while housing stock growth still is slow. The 2010s added the lowest percentage of new housing stock by decade at 2.5%, compared to the 22.5% added between 2000 and 2009. Not since the 1940s, and, notably, World War II, was housing production so low. This potential affordability issue may be seen in the decreases in both the housing stock under \$200,000 and under \$150,000. Furthermore, 21.3% of those with a mortgage and 17.5% of those without a mortgage have housing expenses that are greater than 30% of household income, while 31.8% of renters have rent which exceeds 30% of their household income.

74.8% of total housing stock in the village was constructed before 2000. Only 9.5% of the Village rental stock lies costs greater than \$1,500 per month, much of which would be affordable for a family of four making the AMI. As discussed in 2020 in a report delivered to Racine County and Racine County Economic Development Corporation, Tracey Cross & Associates found this lack of new construction at the high end of the market reduces housing filtering. In the long term, reducing housing filtering can put pressure on renters in the market when those who could afford more expensive rental housing out bid those who cannot afford more expensive rental housing. Therefore, the village staff conclude that producing more housing could free up more affordable housing for those who need it, slow the competition for affordable housing, and keep the existing affordable housing in place. The village staff also note that with an aging housing stock, the village should explore options to ensure the older and more affordable stock is well kept. Dilapidated buildings that fall out of the housing stock may put other pressures on renters and owners already competing for limited housing.

Meeting existing and forecasted housing demand

Village of Mount Pleasant Existing and Forecasted Housing Demand

"In 2010, there were 26,197 residents and 11,136 households in the Village. The Wisconsin Department of Administration's population estimate for the Village in 2019 is 26,976 residents. Based on VISION 2050 population forecasts, which includes the Foxconn development, the plan forecasts 44,700 residents and 19,700 households in the Village of Mount Pleasant in the year 2050. The forecasted population of 44,700 residents is the amount upon which the needs analysis presented in

this chapter is based. Under the plan, the number of Village residents would increase by 18,503 people, or by 71 percent, and the number of households would increase by 8,564 households, or by 77 percent, between 2010 and 2050.”³

The 2021 American Community Survey 1-Year Estimates counted 12,161 housing units in the village. Thus, to meet the forecasted housing demand by 2050, the village must construct an added 7,539 housing units over the next 29 years. This equates to 260 housing units per year, every year, until 2050. Using a 67% owner-occupied, 33% renter-occupied split, the village must construct 130 units of owner-occupied housing and 130 units of renter-occupied housing per year, every year, until 2050.

In 2021, the total market vacancy rate was 3.3%, which was a reduction from the previous year’s estimate of 4.3%. The owner-occupied vacancy rate was 0.0% (+/- 0.2%), leaving an estimated renter-occupied vacancy rate of 3.2%. A healthy vacancy rate for owner-occupied housing is approximately 2%, and a healthy vacancy rate for renter-occupied housing is approximately 8%. Considering the estimated 403 total vacant rental units in 2021, the village could have allowed an added 185 units of owner-occupied housing and could have let the market absorb 169 units of renter-occupied housing in 2021. Since 2010, the village has constructed enough renter-occupied housing to meet forecasted demand in four years, including 2020 and 2021. However, after considering these vacancy rates, the village is approximately 1,941 owner-occupied housing units and 545 renter-occupied housing units behind where it should be to meet 2050 forecasted housing demand.

Racine County Existing and Forecasted Housing Demand

To try and understand the role geographic location plays in forecasting housing demand, the village staff analyzed the same statistics at the County level using the housing element shown in ***A Comprehensive Plan for Racine County: 2035***. The 2021 American Community Survey 5-Year Estimates counted 84,183 housing units in the County. Thus, to meet the forecasted housing demand by 2035, the County must construct an added 4,044 housing units over the next 14 years. This equates to 289 housing units per year, every year, until 2035. Using a 67% owner-occupied, 33% renter-occupied split, the County must construct 259 units of owner-occupied housing and 30 units of renter-occupied housing per year, every year, until 2035.

In 2021 the total market vacancy rate was 6.1%. The owner-occupied vacancy rate was 0.5%, the renter-occupied vacancy rate was 4.3%, and the rest is the estimated margin of error between the two. Considering the estimated 26 vacant owner-occupied housing units and 5,117 renter-occupied housing units, municipalities within the County could have allowed 1,066 more owner-occupied units and let the market absorb 2,751 more rental units. After considering these vacancy rates, the County is approximately 3,647 units behind forecasted 2035 owner-occupied demand, and 4,352 rental units ahead of forecasted rental demand.

The significant difference between the village forecasted owner-occupied and rental-occupied demand shows a geographic mismatch in the location and demand for units. Specifically, the County numbers show more renter-occupied units, and therefore, a reduced demand for them compared to the village units. While the village staff do not have control over County or other municipalities’ decision making, the numbers show programs to either shift more units to owner-occupied status, aid in individual homeownership, aid in moving to or commuting between different communities, or reduced construction of rental units in low-demand areas could help balance geographic mismatch of housing demand. Regardless of spatial mismatch, the numbers show owner-occupied housing construction is notably behind forecasted demand at both the local and County level. Since 2010, the village has only constructed enough owner-occupied housing to meet forecasted demand in two years, and the County has only done so in four years. These years of reduced construction aggregate into long-term housing construction which lag far behind demand. The low renter-occupied vacancy rates, and extremely low owner-occupied vacancy rates emphasize this conclusion.

³ (Southeastern Wisconsin Regional Planning Commission, 2020)

Forecasted Housing Demand Land Use

An increase in 7,539 households, at the minimum lot size of the RL-1 district (6,000 ft², or about a 55' x 110' lot), would require approximately 1,038 acres. If adjusted by an extra 15% to account for required roadway and stormwater facilities, the land needed for housing development totals 1,194 acres or 1.87 square miles. A quarter-acre lot (10,890 square feet, or about a 90' x 120' lot) equals 2,167 adjusted acres or 3.39 square miles. The village currently has 1,032 acres of land currently zoned for residential development. Therefore, the village will need to increase the density of housing allowed above RL-1 and zone more land for residential development. The village's zoning code has five zoning districts denser than RL-1 for which developers may apply in proper areas. The RL, RM, and RH zoning districts all allow small-lot detached houses, two-unit houses, and twinhouses. The RM and RH zoning districts also allow townhouses, multi-unit buildings, cottage courts, and backyard cottages. Only backyard cottages have owner-occupancy requirements; however, the rest of the unit types could help alleviate the housing shortage by either owner-occupancy or renter-occupancy. The village's Comprehensive Plan also has more lands planned for residential development^{4, (gm)5}

Reducing the time and cost necessary to approve and develop a new residential subdivision in the municipality by 20 percent

The village recently adopted a fully online permitting system, which includes digital uploads for supporting documents, GIS integration, and automated workflows. The village staff expect the reduction in paperwork should supply a 20% gain in the time needed to complete complicated permitting workflows that require inter-departmental cooperation such as subdivision plats. The portal also keeps applicants automatically updated with the workflow steps as they progress, which the village staff believe will help aid cooperation between applicants, the reviewing departments, and any public meeting requirements.
